D: Exterior Boundary Creation **705**
Boundary Creation Procedure **705**
View Perimeter Method 705
Preparation *705*
Delete Triangle *707*
View Perimeter *711*
Import Surface From Graphics *712*
Triangulate the Surface *713*
Save the Surface *713*

E: Preference Transferring **715**

F: Contour Data Notes **717**
Contours as Source Data—Basics **717**
Lacking Definition 719
Supplementing Contour Data 722
Generate Inferred Breaklines *723*
Using Contour Data **724**
Procedural Guidelines 725
Summary of Important Points **729**
Parameter Descriptions **730**
Thin Surface *730*
Maximum Segment Length *731*
Point Density Interval *731*
Other Notations **732**
Crossing Contours 732
Tips 732

G: Case Sensitivity **733**
Case Sensitive **733**
Examples 733

Not Case Sensitive **734**
Examples 734

H: Cross Section Editing Primer **735**
Cross Section Editing Overview **735**
Some General Applications 736
Some Specific Scenarios 736
Items to Consider 737
Ponderables *738*
Troubleshooting *738*

I: Intersection Notes **739**
Introduction **739**
General Workflow **740**
Commands Typically Used **741**
Things to Consider **742**
Before 742
During 744
Alerts 746
Roadway Modeling **746**
Surface Naming **747**
Street Layer Naming 748
Style 1—Disadvantages *748*
Style 1—Advantages *749*
Style 2—Disadvantages *749*
Style 2—Advantages *749*
Return Design **750**
Multicenter Curve 750
Advantages *750*
Disadvantages *750*
Fillet Feature 751
Advantages *751*
Disadvantages *751*
CAD and Gen Longitudinal Feature 751
Advantages *751*
Disadvantages *752*
Using Multicenter Curve 752
Operation *752*
Export Curve to Surface *754*
Using Fillet Feature 755
Operation *755*
Decision Tables **756**
Apply Decision Table 757
Delete Feature **758**
Partial Delete **759**
Editing Feature Points **760**
Trimming Features **761**
Extending Features **763**
Set Slope Along Feature **764**
Intersecting Features **765**
Place Feature **767**
Compressing the Surface **768**
Triangle Formation **769**
